

## ERRATA

Bianucci, L., 2010. Carbon, oxygen, and nitrogen cycles on the Vancouver Island shelf, *Ph. D. Thesis*, University of Victoria.

**Equation A.4:** The parameter  $v$  should read  $v^*$

**Equation A.22:**

- Production of oxygen by primary production should distinguish new and regenerated primary production.
- There is a sign error in the nitrification term

The first term in the equation should read: $PQn v_{max} f_I L_{NO3} P_{R_{C:N}} + PQa v_{max} f_I L_{NH4} P_{R_{C:N}}$	Instead of: $PQa v P_{R_{C:N}}$
The nitrification term should read: $-n_{nit} NH_4 R_{C:N} (PQn - PQa)$	Instead of: $-n_{nit} NH_4 R_{C:N} (PQa - PQn)$
