

Lina Garcia-Suarez

Ph.D. Candidate, Dalhousie University, Halifax, Canada

EXPERIENCE

2018-2019

Research Assistant, Universidad del Norte, Colombia

Modelled water quality and ocean dynamics in coastal areas of the Caribbean Sea (Santa Marta and Puerto Colombia, Colombia). Studied of dynamics and properties of shear, stratification, turbulence, and mixing near of a submarine outfall.

2014-2019

Project Consultant, Aquabiosfera, Colombia

Planned and led oceanographic and seawater/sediment quality studies. Conducted consultations for environmental monitoring and assessment of coastal and offshore areas in Colombia.

2011-2014

Research Assistant, Marine Research Institute *Jose Benito Vives de Andreis* (INVEMAR), Colombia

Assessed of seawater and marine sediment quality for environmental consulting and research projects. Developed and performed validation of analytic techniques for quantification of deep sediments pollutants. Participated in several research cruises as responsible of water and sediment sampling.

EDUCATION

2019 - Present

Ph.D in Oceanography, Dalhousie University

Long-term projections of biogeochemical dynamics in the northwest North Atlantic Ocean and the effects on shelf ecosystems and local fishery. Supervisor; Dr. Katja Fennel

2017 - 2019

M.Sc. Applied Physics emphasis in Physical Oceanography, Universidad del Norte, Colombia

Modelled the environmental benefits of a submarine outfall. Case study: Puerto Colombia - Caribbean Sea. Supervisor: Dr. Oscar Alvarez.

2012 - 2013

Diploma in Applied Statistics, Universidad del Norte, Colombia

Multivariate statistics and design of experiments in seawater and marine sediments quality assessment.

2004 - 2010

B.Eng. Chemical Engineering, Universidad del Valle, Colombia

Production of ethanol and lactic acid using *Corynebacterium glutamicum*.

SCHOLARSHIPS AND AWARDS

Kathy Ellis Memorial Book Prize

2020

Highest overall average in first year oceanography core courses. Dalhousie University

Professor F. Ronald Hayes International Scholarship

2019

Scientific Committee on Oceanic Research. Department of Oceanography, Dalhousie University

Nova Scotia Graduate Scholarship

2019 - 2023

Full Ph.D. funded scholarship recipient. Dalhousie University

FIELDWORK EXPERIENCE

(Most recent scientific cruises)

2018 Researcher, Aquabiosfera & Ecopetrol, Caribbean Sea

CTD data collection and seawater, sediments, plankton, and benthos sampling.
Regional cruise. Duration: 12 days. Boat: R/V Maria Jose II (Serport)

2016 Researcher, Aquabiosfera & Anadarko Colombia Company, Caribbean Sea

CTD data collection and seawater and sediments,
Regional cruise. Duration: 23 days. Boat: R/V Don Rodrigo (Serport)

2014 Researcher, Aquabiosfera & Anadarko Colombia Company, Caribbean Sea

CTD data collection and seawater, sediments, plankton, and benthos sampling.
Regional cruise. Duration: 32 days. Boat: R/V Proteus (TDI Brooks)

PROFESSIONAL DEVELOPMENT

2018

- Processing of metocean data applying UNESCO-COI-IODE standards and practices CTD data collection and seawater, sediments, plankton, and benthos sampling. Colombia
- Introduction to hydrodynamic models and statistical tools for modelling validation. Chile
- Ocean modelling using the Coastal and Regional Ocean COnmunity Model- (CROCO). Chile

2016

- Methodologies for evaluation and control of marine pollution and environmental impact assessment in coastal zones. Colombia
- Multivariate ordination statistical methods for the analysis of marine environmental impacts. Colombia
